## THIRST - WIKIPEDIA

## THIRST | DOCTOR | PATIENT

## **i thirst for you pdf**

Thirst is the craving for potable fluids, resulting in the basic instinct of animals to drink. It is an essential mechanism involved in fluid balance. It arises from a lack of fluids or an increase in the concentration of certain osmolites, such as salt. If the water volume of the body falls below a certain threshold or the osmolite concentration becomes too high, the brain signals thirst.

## **Thirst - Wikipedia**

The symptom of thirst is familiar to everyone. Thirst is thought to be part of a corrective mechanism which acts as a support to the physiological control of fluid balance in the body.

Blood Glucose Homeostasis Glucose is the transport carbohydrate in animals, and its concentration in the blood affects every cell in the body. Its concentration is therefore strictly controlled within the range 0.8 – 1g per dm<sup>3</sup> of blood, and very low levels (hypoglycaemia) or very high levels (hyperglycaemia) are both serious and can lead to death.
