Characterizations. An M-matrix is commonly defined as follows: Definition: Let A be a $n \times n$ real Z-matrix. That is, $A = (a_{ij})$ where $a_{ij} \geq 0$ for all $i, j, 1 \leq i, j \leq n$. Then matrix A is also an M-matrix if it can be expressed in the form $A = sI - B$, where $B = (b_{ij})$ with $b_{ij} \geq 0$, for all $1 \leq i, j \leq n$, where s is at least as large as the maximum of the moduli of the eigenvalues ...

Lean software development is a translation of lean manufacturing principles and practices to the software development domain. Adapted from the Toyota Production System, it is emerging with the support of a pro-lean subculture within the Agile community. Lean offers a solid conceptual framework, values and principles, as well as good practices, derived from experience, that support agile ...

The Birth of Probability and Statistics The original idea of "statistics" was the collection of information about and for the "state". The word statistics derives directly, not from any classical Greek or Latin roots, but from the Italian word for state.. The birth of statistics occurred in mid-17 th century. A commoner, named John Graunt, who was a native of London, began reviewing a weekly ...
