There are 454 grams in a pound.) I'll give the energy in several units: the Calorie, the calorie, the watt-hour, and the kilowatt-hour. The unit you might feel most familiar with is the Calorie. That's the famous "food calorie" used in dieting. It is the one that appears on the labels of food packages.

Chapter 14 Potential Energy and Conservation of Energy 14.1 Conservation of Energy ... The work done around the closed path is just the sum of the work along paths 1 and 2, $W=W_1+W_2=...$

Chapter 14 Potential Energy and Conservation of Energy

Stored Mechanical Energy is energy stored in objects by the application of a force. Compressed springs and stretched rubber bands are examples of stored mechanical energy. Nuclear Energy is energy stored in the nucleus of an atom—the energy that holds the nucleus together. nuclei are combined or split apart.
