Non-rocket spacelaunch refers to concepts for launch into space where some or all of the needed speed and altitude are provided by something other than rockets, or by other than expendable rockets. A number of alternatives to expendable rockets have been proposed. In some systems such as a combination launch system, skyhook, rocket sled launch, rockoon, or air launch, a rocket would be part ...

From a science fictional standpoint, Dr. Campbell is of the opinion that laser weapons will fall into three broad categories: Heat Rays. Lasers that shines a beam of near constant power on its target for a prolonged period of time (from a few hundredths of a second or more).. As a weapon they are not as efficient as a blaster, and they do damage more slowly.
