If the user is on a Cisco Unified Communications Manager call and receives an incoming mobile call, iPhone starts ringing and prompts the user to answer or decline the mobile call.

Release Notes for Cisco Jabber for iPhone and iPad 12.5

Extensible Messaging and Presence Protocol (XMPP) is a communication protocol for message-oriented middleware based on XML (Extensible Markup Language). It enables the near-real-time exchange of structured yet extensible data between any two or more network entities. Originally named Jabber, the protocol was developed by the homonym open-source community in 1999 for near real-time instant ...

Ethernet / ? i? ? ?r n ? t / is a family of computer networking technologies commonly used in local area networks (LAN), metropolitan area networks (MAN) and wide area networks (WAN). It was commercially introduced in 1980 and first standardized in 1983 as IEEE 802.3, and has since retained a good deal of backward compatibility and been refined to support higher bit rates and longer link ...

As of August 29, 2014, Google has decided to intentionally break old browsers. They say it's not a bug, it's by design here, even though Google's support page says it accepts Safari 4 as a fully supported browser. If you want Google searches to go back to the modern style, you need to change your User-Agent string.
