A four-dimensional space or 4D space is a mathematical extension of the concept of three-dimensional or 3D space. Three-dimensional space is the simplest possible generalization of the observation that one only needs three numbers, called dimensions, to describe the sizes or locations of objects in the everyday world. For example, the volume of a rectangular box is found by measuring its length ...

Four-dimensional space - Wikipedia

Diffraction refers to various phenomena that occur when a wave encounters an obstacle or a slit. It is defined as the bending of waves around the corners of an obstacle or aperture into the region of geometrical shadow of the obstacle. In classical physics, the diffraction phenomenon is described as the interference of waves according to the Huygens–Fresnel principle that treats each point ...

The Nobel Prize in Literature will once again be awarded, and this autumn Laureates for both 2018 and 2019 will be announced. The Nobel Foundation's Board of Directors believes that the steps that the Swedish Academy has taken and intends to take will create good opportunities for restoring trust in the Academy as a prize-awarding institution.
